Respironics AF531 mask with Aerogen NIVO nebulizer system

With the Respironics AF531 oro-nasal mask and Aerogen NIVO nebulizer system (Pro-X controller, NIVO nebulizer, and NIVO EE or SE elbow) clinicians can provide nebulizer treatments without disconnecting patient circuits and struggling with in-line nebulizer add-ons. The nebulizing elbows are designed specifically for noninvasive ventilation (NIV) and can remain attached when not in use or be easily removed between treatments.

Key advantages

- Supports continuous NIV and medication delivery
- Delivers medication in upright and reclining positions
- Uses Aerogen OnQ™ vibrating mesh technology and Pro-X controller
